- Framermotion

TOOLS

- Github
- Gitlab
- Postman
- npm
- yarn
- Trello
- Gitscrum
- Clickup
- Fligma

WORK EXPERIENCE

Patan College for Professional Studies

Jr. Software Developer Intern | oct,2023- present

1. Edusys

- Developed the edusys system, a comprehensive educational management platform for PCPS College.
- wide range of CRUD applications, handling over 150 database tables, and integrating a responsive design to ensure swift navigation. I also managed complex file handling and routing tasks.

2. PCPS Website

- Created static site for PCPS website using HTML, CSS, Bootstrap and javascript.

Mern Stack Traning

16th ma- 16th aug 2024

- I have developed a robust Personal Management system utilizing the MERN stack, which features JWT-based authentication. This application manages access and refresh tokens securely through cookies. It also integrates multer and Cloudinary to ensure efficient and scalable file uploads.
- The system includes a comprehensive task management feature, where users can create task boards, add tasks, and manage them effectively. Additionally, it offers an expense tracker that helps users monitor and manage their expenses seamlessly.

Patan College for Professional Studies (PCPS)

Jr, Software developer | dec,26 - current

1. PCPS library Mobile Application

Tech stack : Flutter

- PCPS Library is the comprehensive application designed for students where they can reserve the book, check their fines and also renew
- As a Flutter developer, I developed a user freindly design for this project. For the state management, provider was used. Furthermore, the MVVM model's clean architectural pattern is applied in the project that follows.

2. MYM Raktaveer

Tech stack : Flutter

- User can request blood around 10 km radius from hospital
- User can donate blood based on the matching blood request
- Implemented real time chat feature with socket io
- Integrated map for searching places and getting user current location
- For state management, provider is used with clean architecture

3. SF-36

Tech stack : Flutter and SQL Lite

- SF-36 is a sqllite based project for gathering for Beta Thai Hepatic survey
- All the responses can be generated in pdf and excel sheet

4. MYM Privilege card

Tech stack : Flutter

- User can gain exclusive benefits and discounts to members.
- User can view their membership card with
